Product Description

Product Description:

The Electric Cargo Delivery Bike is equipped with a reliable hub motor that provides a smooth and powerful ride. With a top speed of 45 km/h, you can get to your destination quickly and easily. Plus, the disc brake system ensures that you can stop safely and quickly when you need to.

With a charging time of just 4-6 hours, you can quickly recharge the bike when needed and get back on the road. This makes it ideal for businesses that need to make multiple deliveries throughout the day.

The Electric Cargo Delivery Bike is designed with practicality and convenience in mind. It features a large cargo area that can be used to transport a variety of goods, from small packages to larger items. This makes it a versatile option for businesses of all sizes.

Overall, the Electric Cargo Delivery Bike is an excellent choice for anyone who needs a reliable and efficient way to transport goods around the city. With its long range, powerful motor, and convenient cargo area, it is the perfect solution for businesses that want to reduce their carbon footprint and improve their delivery efficiency.

Features:

Product Name: Electric Cargo Bike

Range: Up To 50 Km

Motor: Brushless

Warranty: 2 Years

Smart Type: Sensor, Electronic

Cargo Capacity: Up To 150 Kg

This Electric cargo delivery bike is perfect for all your delivery needs. With a range of up to 50 km, a brushless motor, and a smart sensor and electronic system, this bike is reliable and efficient. Plus, with a cargo capacity of up to 150 kg and a 2-year warranty, you can trust this bike to get the job done.

Applications:

One of the best things about the Thunder Electric Bike is its versatility. It can be used for a wide range of applications, making it a great investment for businesses that require a reliable and efficient delivery option. Here are some of the occasions and scenarios where the Thunder Electric Bike can be used:

Food and Grocery Delivery: The Thunder Electric Bike is perfect for delivering food and groceries. Its electric motor allows riders to make quick trips, which is essential for ensuring that food and groceries reach customers while they are still fresh.

Package Delivery: The Thunder Electric Bike can be used for delivering packages of all sizes. Its cargo area is large enough to accommodate packages of different sizes, without compromising on the safety of the items being transported.

Courier Services: Courier services can benefit from the Thunder Electric Bike's speed and efficiency. With its 45km/h speed, the bike can deliver packages quickly, ensuring that they reach their intended destination on time.

Business Deliveries: The Thunder Electric Bike is a great investment for businesses that require efficient and reliable delivery services. With its 2-year warranty, businesses can be assured that they are making a good investment.

City Transportation: The Thunder Electric Bike can be used as a means of transportation in cities. It can be used to commute to work or for running errands around town. Its electric motor makes it an eco-friendly option for those who want to reduce their carbon footprint. The Thunder Electric Bike has a charging time of 4-6 hours, making it easy to recharge between deliveries. Its powerful motor and durable frame make it a reliable option for businesses that require an efficient and reliable delivery option.
